

ACKNOWLEDGEMENTS

In 2002, the New York State Department of Health staff collaborated with a workgroup convened to revise the Sexual Offense Evidence Collection Protocol, which has been renamed the *Protocol for the Acute Care of the Adult Patient Reporting Sexual Assault*. The members of the workgroup and other consultants represent various disciplines that are directly involved in addressing the needs of adults who have been sexually assaulted. This newly revised *Protocol* is the result of the combined efforts of those listed below and additional individuals committed to the provision of quality care to adults who have been sexually assaulted. We are grateful to all of these individuals, who spent considerable time and effort working with us to produce a *Protocol* that provides guidance on the most current standards of compassionate and consistent care and evidence collection procedures.
